

METEX

DELIVERING THE TECHNO - EDGE

MEHTEX ENGINEERING PVT. LTD., started in 1985, with a vision to provide world-class quality aluminium die cast components. Mehtex today is one of the leading manufacturers of Aluminium Pressure & Gravity die castings. Our permanent focus on establishing quality components helps various Industries & companies to cut down on their cost combined with outstanding product performance.

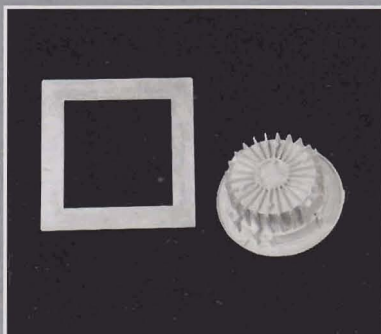

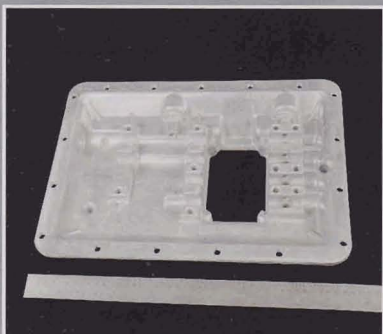

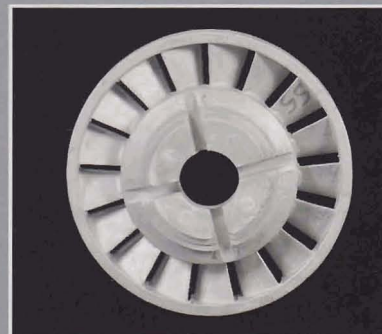

With more than 25 years of experience & a team of technocrats, Mehtex today is touching new heights to redefine excellence. Its vision, team dedication and excellence are the keys to its success in building long-term relations with its customers.

Facility

Located in the north industrial zone of Ahmedabad, our state-of-the-art, plant has a total area of 11,000 sq. ft. of land with a built up area of 7,500 sq. ft. Our machineries include 7 nos High Pressure die casting machines ranging from 60 tonnes to 650 tonnes., installed with equivalent number of gas fired furnaces. Castings ranging from 10 gms to 20 kg. can be manufactured. Mehtex today produces annually 500 metric tonnes of aluminium castings.

Mehtex Engineering has a complete in-house tool room facility, for design & development of dies & tools with best quality and least lead time.

We, at Mehtex, provide complete solutions to our valued customers, from design, development, castings, machining, finishing, assembly & testing. Mehtex has full fledged in-house machining facilities like drilling, tapping, turning, vibro finishing, shot blasting and assembling.

Industries Served

Mehtex Engineering has gained an expertise in working with many industries like Automotives, Textiles, Pneumatics, Hydraulics, Pharmaceuticals, Electrical Pumps, Light Fittings, Flame Proof Fittings & General Engineering. Mehtex's prime focus is on developing export business & serve customers with complete assembly castings.

Castings & Products

Some of the automotive spares which are currently under production are, connecting rods, suspension links, diesel spray nozzles, timing covers, junction boxes, timing pulleys, aluminium manifold pipes and elbows, etc.

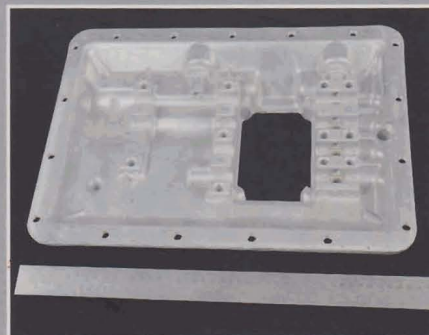

Quality Policy

We are committed to giving quality castings & assemblies to our customers. In order to achieve it, Mehtex has continued to invest in process upgradation, new technology and quality control systems. To further ensure quality at every step, the quality control department has been set up to implement ISO 9001:2008 due to be completed by 2012. We, at Mehtex Engineering, continuously improve the processes and provide training to our employees, vendors, thus ensuring complete satisfaction of our customers.
